

COVID 19! Keep praying for the Philippines!

Several Pastors have died from Covid!

This pastor (Jerry Siasat) died from Covid this past week. He was only 59 and had trouble breathing and went to the hospital. The hospital was full and he could not be admitted. He was a faithful kingdom worker of the church and left behind his sweet wife Lolit, and three children.

We had another pastor (Imm Mapusao) in Bacolod pass away last month. Also, a pastor's wife in the mountains on the South part of Negros died from Covid. Few people have had the vaccines and there are very limited hospital beds!

Please keep the Philippines in your prayers!

Our Vision for Missions office staff are monthly visiting among the churches and encouraging the starting of Discipleship Classes using materials

called TEE. We rejoice that the pictures above show another new class recently started on the Oriental side of Negros. This area is also establishing a Leadership Training class this month with 35 students enrolled. It will be meeting for two years. On Negros there are four different groups of workers that meet together monthly to encourage one another and help strengthen the churches. We encourage all workers to work together in unity with sister churches to mutually benefit the existing churches and to start new churches!

Here are two recent printing tasks that were just completed!

VFM has two staff members that each week are working to help the churches. Mary Bacalso works with the printing ministry and communication with the pastors. Ariel Abobot travels to visit churches each month and helps to start new TEE classes. Praise God for their faithful ministry!

New Church on Panay Island!

This is a new church plant that was recently started on the Island of Panay. Praise God for those who helped plant this new church!

WANTED: New Churches

This used to be an old house that was vacant! Some of the walls were removed and now it is a new church! We are thankful when new churches are established! VFM often helps them with materials for discipleship as soon as possible.

We are glad to hear of new churches like the one on Panay that are in remote areas.

Sometime it is in the cities and finding a location to meet is a challenge.

We have encouraged every church to **"have a baby"** by beginning another new church.

Make Disciples:

Teach
Baptize
Teach

Personal Note:

The World Mission Builders help churches around the world! Last month, I was privileged to help with this building project at a camp in Iowa! Below is a picture of their help for a church camp on the Island of Negros. Please keep their director, Ed

My mother, Ruby Wilson, celebrated her 101st birthday on September 26th with a small gathering in our home with family and friends.

We are so thankful to be living here in Oklahoma and able to see her often. She is in good health and still very active.

Thomas, in your prayers as he deals with health concerns.
Praise God for this ministry!

Vision for Missions Help

Three more large boxes of clothing, books, school supplies and misc. items were sent to the Philippines. It often takes up to four months for the boxes to arrive but what joy it brings to many! In the last year, Mary has sent over twenty of these large boxes to Negros.

Thank you for helping financially to VFM this past year. We have helped so many during this year of Covid. We are seeing new churches started, and many are using the materials that we print. Last month another church building was completed and several other churches were helped with materials. Several times we have helped church leaders with rice, food and medical help.

Thank you for making this possible!

Keep us and the Philippines in your prayers.

VFM Finances!

Thank you for your prayers and financial giving to VFM. We look forward to continued encouragement with the Philippine churches in the future! There are always a number of needs and

**VFM tries hard to help with many of the requests. We have
several construction needs currently!**
